Coding	Colour	Coding	Colour
AluNature01	Natural (VOM1)	AluCopper01	Light copper (orange)
AluGold00	New silver	AluCopper02	Medium light copper
AluGold01	Champagne (Very light gold)	AluCopper03	Medium dark copper
AluGold02	Gold (VOM2)	AluCopper04	Dark copper
AluGold03	Dark Gold (VOM3)	AluOldCopper01	Light old copper
AluBronze01	Titanium, light bronze (C31)	AluOldCopper02	Medium old copper
AluBronze02	Medium, light bronze (C32)	AluOldCopper03	Medium dark old copper
AluBronze03	Medium bronze (C33)	AluGrey03	Dark grey
AluBronze335	Medium dark bronze	AluGrey04	Anthracite dark grey
AluBronze04	Dark bronze (C34)	AluBlue01	Dark blue
AluBlack01	Black (C35)	AluGreen01	Dark green
AluBrass01	Light brown brass	AluRed01	Light red (pink)
AluBrass02	Medium light brown brass	AluRed02	Medium light red
AluBrass03	Medium dark brown brass	AluRed03	Medium dark red

Anodizing

Coding	Layer thickness	Use
A20	20 micron	Outdoor use (standard outdoor use)
A25	25 micron	Outdoor use (industrial / coastal area or BS 3987)

Lightweight material

Low maintenance (easy to clean)

Anodizing = Al₂O₃ = 100% reusable

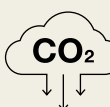

A1 Fire rating (non-combustible)

LCA - Expected lifespan of more than 80 years

Ultra-durable, corrosion-resistant and colourfast

EPD - Low carbon oxide emissions

Scratch resistant

Pre-treatment

Coding	Pre-treatment	Finish
E2	Brushing (VB2)	Visible brush marks
E5	Grinding + Polishing (VB5)	Smooth shiny surface
E6	Chemical matt etching (VB6)	Matt surface
E7	Chemical bright	Shiny bright surface
E8	Polishing + chemical bright	Smooth shiny bright surface
E9	Shotblasting + chemical bright	Shiny sparkle surface
E10	Shotblasting + matt etching	Smooth ultra matt surface

When architectural excellence meets with the highest technical and aesthetic specifications, we get to enrich our surroundings with the prominent and authentic characteristics of aluminum.

About Alumet

Alumet has been a preferred supplier to architects and designers like you, for over half a century. Pioneering relentlessly to find new anodizing techniques and developments in aluminum facade and wall cladding. Because aluminum has always been our canvas: the endlessly recyclable, light weighted metal of the future that adds an avant-gardist edge to every surrounding.

With our cutting-edge technology, we do not only strive to deliver products that bring architectural visions to life, but we also aim to minimize our own environmental footprint by finding new ways to reduce the use of natural resources in our production process.
