

Technical Data Sheet Etching Promotor Spray

Adhesion promoter for coating anodized aluminium

Etching Promotor Spray prepares anodized aluminium surfaces for further coating. It removes surface contamination and activates the anodized layer to improve coating adhesion, eliminating the need for sanding.

Technical Properties

- Solvent-based mixture – colourless
- Professional use
- For indoor and outdoor use
- Protect from frost (during storage/transport)
- Ready to use
- Coverage: up to 25 m², depending on application

Use

- Use the product undiluted.
- Apply with a Duthoo Degreasing Cloth, in two passes.
- Wet the surface until fully moist and allow to react for 10–15 minutes.
- Coat/lacquer the treated surface within 2 hours. If this time is exceeded, repeat the treatment.
- Always test on a small area before starting.

Package

- 400 ml spray can
- 1 L
- 5 L
