

Technical Data Sheet Touch-Up Pen

Water-based touch-up lacquer for anodized aluminium

1-component water-based touch-up lacquer for small, local colour repairs on anodized aluminium, ideal for correcting minor scratches or marks. Suitable for anodized aluminium façades, frames, panels, trims, and similar architectural parts. Available in colours to match common anodized shades, including transparent and different gloss levels where applicable.

Technical Properties

- Felt tip width: 5 mm
- Replaceable felt tip
- High-quality water-based colour lacquer
- Good adhesion on anodized aluminium
- Professional use
- Shelf life: 1 year (unopened packaging)
- Unaffected by frost, humidity, or heat (during storage/transport)

Use

- The surface must be clean, dry, and free of grease or contaminants.
- Shake well before use for at least 10 seconds until the colour is fully uniform.
- Avoid use below 15 °C and in extreme heat or high humidity.
- Saturate the felt tip by pressing it onto the surface a few times.
- Apply the lacquer in smooth, even strokes to the damaged area only.
- Allow to dry and assess the colour match; apply a second layer if needed.
- If the pen has not been used for a longer period, it is recommended to fit a new felt tip.

Package

- 12 ml pen
