Deep Cleaning

Cleans – refreshes anodized aluminium

Deep Cleaning removes stubborn atmospheric soiling and built-up dirt from anodized aluminium surfaces, restoring a clean, even appearance.

Suitable for anodized aluminium on façade elements, window and door frames, entrance doors, balustrades, cladding, and other architectural applications.

Technical Properties

- Application temperature: 10 to 20 °C
- Specific gravity: 1 kg/L
- Do not use in full sun or at high temperatures
- For professional use
- Protect from frost and high temperatures (during storage/transport)
- pH: 7 (neutral)
- Antistatic
- Does not damage glass or sealing joints
- Completely solvent-free

Use

- Test the product on a small, inconspicuous area before full use.
- Remove loose dust and coarse dirt first.
- Shake well before use.
- Apply Deep Cleaning to a clean, soft, lint-free cloth and work it evenly over the anodized aluminium.
- Continue rubbing until the dirt is released and no visible product residue remains.
- Wipe the surface with a slightly damp cloth or sponge to remove remaining loosened contamination.
- Buff lightly if required for heavily soiled areas.
- Repeat the treatment if necessary.

Package

- 500 ML
- 5 L
